

# THE BLAIRMORE ENTERPRISE

VOL. XVIII, NO. 38.

THE BLAIRMORE ENTERPRISE, THURSDAY, SEPTEMBER 22, 1927.

\$2.00 PER ANNUM

## PUBLIC NOTICE

As a precaution against the spread of INFANTILE PARALYSIS, no dance or whisky party will be permitted within the Town of Blairmore until further notice.

Also, children under 18 years will not be permitted to attend theatres until further notice.

The Board also orders that all public meeting places, which includes lodge halls, be sprayed regularly with disinfectant.

By order of the

## BLAIRMORE BOARD OF HEALTH.

Dated at Blairmore, Alberta,  
this 21st day of September, 1927.

ST. LUKE'S CHURCH (ANGLICAN) COWLEY SCHOOL FAIR  
IS POSTPONED

Service Sunday, September 25—  
Litany and Holy Communion at 11 a.m.—Sunday school at 10 a.m.

Sunday, October 2—Harvest Festival 7 p.m.

Saturday, October 8—Ladies of the Church will hold a Tea and Pantry Sale in the Elks' Hall from 3 to 6 p.m.—A. D. CURRIE, Incumbent.

Donald McPherson of Macleod, a war veteran, was recently killed when a truck he was driving turned turtle at a point ten miles west of Macleod on the Red Trail on Monday evening.

Owing to the presence near Cowley of a case of Infantile Paralysis, the committee in charge of Cowley's annual school fair has decided to postpone the fair indefinitely.

The fair was to have been held tomorrow.

The Consolidated Mining & Smelting Company, of Kimberley and Trail, have decided to enter the mining industry in Newfoundland, their first investment being in the Red Indian Lake property in the Buchans district.

### STEPS TAKEN LOCALLY TO PREVENT SPREAD OF INFANTILE PARALYSIS

A joint meeting of the town council and school board was held in the council chamber on Sunday night, to consider steps to take with a view to preventing the infection and spread of the infantile paralysis epidemic in this district.

There were present the following: Mayor J. H. Farmer, Councillors W. A. Beebe, M. Hamilton, M. Sartoris, Evan Morgan and W. McVey; school board members W. H. Chappell, R. W. H. Pinkney, J. Angus McDonald and Secretary Naylor; Principal McPherson and Vice-Principal Munroster, of the public school; W. J. Bartlett, Sergt. Duncan, A.P.P., Chiet Spender and Dr. Olivier.

The meeting was opened with Mayor Farmer in the chair and Mr. A. J. Kelly acting as secretary.

Mr. Farmer explained that the meeting had been called on account of Infantile Paralysis having appeared in the district, within thirty-five miles of the town, and suggested that a board of health should immediately be appointed and that all steps necessary towards prevention of the spread of the dreaded disease into our locality be taken.

The board of health was appointed as follows: J. E. Gillis, F. M. Thompson, W. J. Bartlett, with Dr. Olivier and Mayor Farmer as ex-officio members; also Sergt. Duncan and P. M. Christophers, M.L.A.

Acting upon the advice of the Medical Health Officer, the board decided to place a ban on public dances for an indefinite period; also to prohibit children under the age of eighteen years from attending theatres.

We understand that similar action to the above has been taken at all points in the district, except Coleman, but Coleman is expected to fall in line following a meeting of the Coleman Board of Health this afternoon.

An effort is being made to secure pamphlets, such as are being distributed by the Red Cross and various insurance companies, sufficient to cover the district. These pamphlets contain information regarding infantile paralysis along similar lines to articles found elsewhere in this issue of The Enterprise.

Up to the present there is no sign of the disease in Blairmore.

Mr. E. Munroster questioned as to whether any steps should be taken towards closing theatres, or preventing children up to a certain age from attending same, since there is a prevalence of whooping cough locally, to which Dr. Olivier answered that shows were a bad place for dissemination of disease, and that such matters could be dealt with by the board of health.

Mr. Chappell stated that Coleman would be willing to co-operate in any organized effort to help stamp out the epidemic.

Sergt. Duncan suggested that an effort be made to secure a provincial medical health officer for the unorganized portions of the district.

Dr. Olivier briefly described the symptoms of the disease, and answered various questions. He suggested that the principal of the school immediately notify the doctor of any children sent home on account of sickness. He also advised an increase of disinfectant in sweeping compound used in the schools and that children be taught to spray nose and mouth regularly with a salt and water gargle.

The meeting decided that any new families moving to town should be examined by the Medical Health Officer.

A bulletin from the Provincial Department of Health, outlining symptoms of the disease and methods to be adopted towards prevention, treatment, etc., was read by the secretary.

The meeting adjourned.

The Sangster family were visitors to Michel and Fernie on Sunday last.

### MEDICAL HEALTH OFFICER APPOINTED FOR DISTRICT'S UNORGANIZED TERRITORY

In response to two messages sent Tuesday afternoon to the Provincial Department of Public Health, urging upon the department the necessity of appointing a medical health officer or supervisor over the many sections of unorganized territory throughout this district, which would include Crow's Nest, Seniors, Bush Towns of Coleman, Hillcrest and Bellevue, Maple Leaf and Passburg, Dr. J. Olivier received a wire on Wednesday afternoon, advising of his appointment as supervisor over the unorganized territory between Crow's Nest and Passburg, known as Municipal District No. 71.

Dr. Olivier has also been appointed to perform similar duties throughout Municipal District No. 70, which extends east as far as Brocket.

### BOARD OF HEALTH MEETS

The first meeting of the newly appointed Board of Health was held in the council chamber on Monday at 1:30 p.m. Mr. J. E. Gillis was elected chairman. There were present Messrs. J. H. Farmer, W. J. Bartlett, F. M. Thompson and Dr. Olivier, members; also Sergt. Duncan and P. M. Christophers, M.L.A.

Acting upon the advice of the Medical Health Officer, the board decided to place a ban on public dances for an indefinite period; also to prohibit children under the age of eighteen years from attending theatres.

We understand that similar action to the above has been taken at all points in the district, except Coleman, but Coleman is expected to fall in line following a meeting of the Coleman Board of Health this afternoon.

An effort is being made to secure pamphlets, such as are being distributed by the Red Cross and various insurance companies, sufficient to cover the district. These pamphlets contain information regarding infantile paralysis along similar lines to articles found elsewhere in this issue of The Enterprise.

Up to the present there is no sign of the disease in Blairmore.

Mr. E. Munroster questioned as to whether any steps should be taken towards closing theatres, or preventing children up to a certain age from attending same, since there is a prevalence of whooping cough locally, to which Dr. Olivier answered that shows were a bad place for dissemination of disease, and that such matters could be dealt with by the board of health.

Mr. Chappell stated that Coleman would be willing to co-operate in any organized effort to help stamp out the epidemic.

Sergt. Duncan suggested that an effort be made to secure a provincial medical health officer for the unorganized portions of the district.

Dr. Olivier briefly described the symptoms of the disease, and answered various questions. He suggested that the principal of the school immediately notify the doctor of any children sent home on account of sickness. He also advised an increase of disinfectant in sweeping compound used in the schools and that children be taught to spray nose and mouth regularly with a salt and water gargle.

The meeting decided that any new families moving to town should be examined by the Medical Health Officer.

A bulletin from the Provincial Department of Health, outlining symptoms of the disease and methods to be adopted towards prevention, treatment, etc., was read by the secretary.

The meeting adjourned.

The Sangster family were visitors to Michel and Fernie on Sunday last.

### LOCAL BOY WINS GOLD WATCH

Jack Kerr, son of Mr. and Mrs. John A. Kerr, local distributor of MacLean's Magazine, received a surprise last week in the shape of a beautifully engraved gold watch in recognition of his great success as a salesman. Jack headed his district and deserves great credit for his enterprise.

### GRAHAM—LETTS

A quiet wedding took place at the home of Dr. and Mrs. W. T. Rush, Edmonton, on Wednesday, September 14th, of John H. Graham, third son of Mr. and Mrs. F. G. Graham, of Coleman, and Miss Violet E. Letts, R.N., of Lacombe, Alberta. The ceremony was performed by Rev. W. Hollingsworth, of the United church.

### LIVINGSTONE LODGE NO. 22, K.P.

We are asked to announce that the regular convention of the Lodge to have been held Friday, September 23rd, has been postponed to Friday the 30th.

On tomorrow (Friday) night, a special meeting of Greenhill Temple No. 10, Pythian Sisters, will be held, at which the grand chief of the Alberta jurisdiction will pay an official visit.

Miss C. C. Dodge has taken up the position of dietitian at the Bellevue hospital. She is a graduate of Glasgow, Scotland, and held the position of dietitian at the Infants' Hospital, Halifax, Nova Scotia, for four years, as well as teaching domestic science in the evening school attached to the technical college.

Dr. and Mrs. R. P. Borden, Mr. and Mrs. J. A. McLeod and Mrs. McLeod, senior, were dinner guests at Dr. Reinhard's at Bellevue on Wednesday evening.

Engagement and wedding rings of value and distinction

Two nuptial rings you give her can never be replaced. Their purchase is among the most important in life, and should by all means be made at a well-known, thoroughly reputable house. Our rings are of recognized value, fashioned in all the newer settings. And our standing in this community, together with membership in the Gruen Watch Makers Guild, assures your satisfaction.

## WORLD HAPPENINGS BRIEFLY TOLD

The honey harvest of Southern Alberta is expected to run to 300 tons, worth about \$10,000.

A remarkable and increasing demand for Canadian food products in Great Britain is reported by Major G. B. Johnson, Canadian Government trade commissioner for Glasgow.

Canada's net debt decreased by \$63,789,151 during the first five months of the present fiscal year which opened on April 1, according to the monthly financial statement issued by the Department of Finance.

A total of 543 commercial vessels passed through the Panama Canal during the month of August, this being a new record. The previous record was 509 transits, made in July, 1927.

All the inhabitants of Turkey, including foreigners, are to be counted in their homes for all entry day on October 28, according to official regulations issued at Constantinople, fixing that date for the national census.

The long awaited railway to make has been opened to public traffic. The Government program of 1923 for linking up the British Empire by wireless is now complete, beam communication to Canada, Australia and South Africa being already in operation.

It is reported that Japanese divers at Sebastopol, Crimea, who were searching for a half-a-million sterling in gold (\$2,500,000) aboard the British cruiser Black Prince, have discovered the first gold coin. The coin bears the inscription of George III, and the date 1821.

It is expected that within six weeks it will be known whether or not oil in commercial quantities is to be added to Northern Ontario's inventory of wealth, for by that time tests which the provincial Government has been conducting in the Mattagami Valley will be completed and a report upon them made.

### Hospitals Care For Patients

Eight thousand hospitals in the United States and Canada take care of 12,000,000 patients a year or about \$25,000 a day. It is estimated five billion dollars are invested in the hospital property and in the opinion of Dr. E. S. Gilmore, head of the American Hospital Association, it now is disgraceful or criminal to die under 75 years of age. Unfortunately many persons seem more or less reluctantly obliged to lie or what of hospitals can do for them.

**Risk It in For Large Back.**—A light rubber with Dr. Thomas' Eclectic Ointment will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. It is also a cure for varicose veins. As the blood sinks in the pain comes out and there are ample grounds for saying that it is an excellent article.

### Planes Replacing Dogs

With aeroplanes coming into use all over Alaska for freight transportation, dogs are being used less and less on the trails. Consequently, there is an over-supply and hundreds of huskies, abandoned, have reverted to the wild state and are becoming the most dangerous kind of marauders.

## BURNS

Minard's soothes and reduces the inflammation. Keep it on hand for sprains, bruises and flesh wounds.

W. N. U. 1888

## Air Base In Near East

**Britain Planning One At Malta To Protect Suez Canal.**

The British air ministry is said to be planning development of a great air base at Malta which will dominate the Eastern Mediterranean and will protect Egypt and the Suez Canal against attack.

This also is regarded as a precaution in view of Premier Mussolini's plan of developing a great military and naval base at Rhodes.

It also is learned that the Nizam of Hyderabad, who is one of the greatest semi-independent native princes, is planning to establish an air service, his dominion and is sending a number of young men of the leading families to be trained for air work in England. While of course, the services will be paid for out of the revenues of the Nizam, it will be co-ordinated with the imperial service in India.

## France Raises Tariff On Canadian Wheat

**Notice Of Increase Has Been Received At Ottawa**

France has increased the tariff on Canadian wheat from 20 cents to 27 cents, approximately, per bushel, according to official advices received from the Canadian Trade Commissioners in Paris. The higher rate comes into effect immediately.

While Canada's export of wheat to France has fluctuated from year to year, the present change on the basis of last year's export of 4,155,867 bushels will mean an increase in the total French duty collected on Canadian wheat of nearly \$250,000.

Canada, under the 1922 treaty between the two countries, enjoys a minimum tariff and most favored nations' treatment on exports to France and the increase now put into effect is due to the raising of the minimum wheat rate to all countries by France.

## Winnipeg Newspaper Union

A Chic One-Piece Frock

Unusually smart in this modish one-piece frock of slenderizing lines Contracting material may be used in the skirt, while the panel, vest and narrow belt fasten with a buckled No. 1644 is in sizes 26, 33, 40, 42, 44 and 46 inches bust. Size 33 requires 2½ yards 28-inch, or 2½ yards 54-inch for the neck and 1 yard 5½ inches for collar, vest, shield panel and sleeve facings. Price 20 cents in pattern book. Illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

### Safety Device For Banks

A new guard against the bank raid has been perfected from the addition of the microphone used during the war for espionage detection. The device does not receive noise on street vibrations, but the slightest tap upon the safe it guards will send warning signals to police stations.

When a man acts like a mule the latter would be justified in kicking him.

If sometimes the tea you are using does not taste as good as it used to—just see what kind of a package it is in. No chances are taken with Red Rose. It is packed in clean, bright Aluminum.

## Claims Darwin Was Right

**Man Descended From Ape-Like Being Distinguished Scientist**

Darwin was right, declared Sir Arthur Keith, the distinguished scientist addressing the British Association for the Advancement of Science, at Leeds, England. Sir Arthur not only agreed that man had descended from an ape-like being, but he gave mankind an antiquity of 1,000,000 years.

"As we go backward in time," said Sir Arthur, "we discover that man becomes broken up, not into separate races as in the world of today, but into numerous and separate species. When we go into a still more remote past they become so unlike that we have to regard them not as belonging to separate species but different genera. It is amongst this welter of extinct fossil forms which stretches the ancient world that we have to trace the zigzag line of man's descent."

**More Sleep Necessary**

**Night Hours Required Under Strain Of Modern Life**

Eight or ten hours sleep are necessary if you wish to keep fit and live to a good old age. This is the prescription of Dr. A. T. Nankivell, health officer at Plymouth, Mass., where the Mayflower landed. We crowd into our days three times as much as our grandparents did and the strain of modern life is far greater, yet it is doubtful if we take as much rest as they did. That may be the reason more Americans die of heart disease than of anything else. In bed the labor of the heart is reduced one-half. A man who has a strenuous day's work under modern conditions should sleep his eight or ten hours, says Dr. Nankivell, if he wishes to keep his youth, and keep his arteries elastic.

**Alberta Sugar Beets**

**Expect Crop This Year Will Be Largest in History**

Officials of the Canadian Sugar Factories, Limited, estimate the largest crop of sugar beets this year in the history of the industry in Alberta. The crop will be from 45,000 to 50,000 tons, in their judgment, as compared with 41,000 tons last year. The acreage has increased within the year by 800.

The Alberta Sugar Company, which already has a refinery at Raymond, is planning the erection of a second plant at Hillsprings, in Southern Alberta, where conditions of sugar beet growing have been found to be most satisfactory.

### Prescription Of Automobile

I was talking recently with a big automobile man in a tall town. We walked up a long street, and he made an estimate of the cost of automobiles parked along the way. I have forgotten the figures, but they were enormous. I recall, however, that he said the depreciation on the automobile we saw during the walk amounted to ten thousand dollars a day. There are millions of automobiles in the United States. What is the depreciation of new ones sold every day, and of those previously sold?—E. W. Howe's Monthly.

"Now," he cried, "I've a certainty for you today in the next race. Back Loosie Button, it's sure to come off!"

Mirard's Liniment relieves backache.

**Air Patrol Covers Large Area**

Approximately 165,000,000 acres of forest land in the provinces of Ontario, Manitoba, and Alberta were under a system of aerial protection during 1926.

### Great Icebergs

Giant icebergs, 400 feet high and eight miles in extent, were recently sighted by the master of the British Steamer Mataua, bound from New Zealand to Montevideo.

It isn't the cost of living that worries the man behind the bars.

## A Warning To Motorists

### Practice Of Giving Lifts To Strangers Is Dangerous

The American Automobile Association has sent out a nation-wide warning to motorists to abandon the prevalent practice of giving lifts to strangers along the road. Pointing out that a serious national problem is being created by the kindly roadside traveller because more than seventy per cent. of these "down and outers" later must be cared for in some charitable institution, the association also cautions the motorist on the score of his responsibility should an accident occur, inasmuch as there have been many cases in which the free-riding passenger collected heavy damages from his host.

No better advice could be given the motorist than frankness. All the dangers of "driving" are well explained in the A.A.A. bulletin, however. There is the "stick-up" man who, with a lead on his face, holds up his finger to "bum" a ride. If the motorist is kind he stops and calls a cheery "Hop in!" The bandit accepts with alacrity, and, hiding his face on the back seat until conditions are propitious, slugs the driver and his companion dump the bodies alongside of the road, and speeds away. In this connection it is only necessary to recall the horrible murder some years ago in New Jersey when a young couple returning from a dance graciously gave a lift to two men waiting on a street corner, little realizing that they had but a few minutes to live.

It is not safe or wise to stop at any time or any place to give a lift to anyone. If you are young and healthy, you can wait until the bus comes to pick you up; the chances are a hundred to one that the motorist at the end of the ride, no matter how long or how short, will get no thanks from this modern type of bogger, and that the motorist by his act is helping in the stagnation of any character that the youth might possess.

As to the question of the passenger suing his host if there is an accident, and the ease of hold-ups under such circumstances, there can be no controversy. Motorists should realize these things and stop for no one, whether in the city or in the country, because under any circumstances they are either putting themselves in grave danger or contributing to the delinquency of future citizens of this country.

**Looked Like a Certainty**

"Are you a ladies and gentlemen?" asked the voice of the voice-voiced tipster at the race-meeting. "What did I tell you yesterday?"

Nobody made an answer to this question, and once more the tipster began his shouting.

" Didn't I say that Broad Bean wasn't a runner?" he yelled. "And didn't I say that Dusty Carpet would be running, and that Dusty Carpet would take a lot of beating?"

Still there is no answer. But the powerful-voiced man was not a bit dismayed.

"Now," he cried, "I've a certainty for you today in the next race. Back Loosie Button, it's sure to come off!"

The rider stopped short, as it amazement, and then slowly dismounted.

"Stranger," said he, "I ain't going to let a little matter of ninety-five dollars stand between me and a mile trade. The mule's yours."

**Meaning Of London**

Many Theories Have Been Advanced As To Its Derivation

The name London is the subject of much discussion among philologists in Great Britain.

One theory is that it means "fort by the lake," from the Welsh "lyn," lake, and "dun," a fortified place. Another is that it is derived from the Norman "lond," or administrative "lunden," a sacred grove.

There is a town in Yorkshire called Lund after Lund in Scandinavia, at one time one of the chief commercial cities in Sweden. It was founded by Britons in Roman times. It is thought that Lund in Yorkshire, Lund in Sweden and Lund, or London, were probably the sites of sacred groves, where the priests of the Bronze Age offered human sacrifices to the Sun God.

**Bears Make Friends With Miners**

A strong friendship has sprung up between wild bears and the miners employed at the Barbara camp, N.C., 5,000 feet above sea level, where copper deposits of the Britannia Mine are being worked. The bears were driven from their usual haunts by an unusually early snow storm. When they appeared in camp they were standing and eagerly devoured the food offered by the miners. The bears quickly gained confidence and now take scraps from the men's hands without sign of fear or viciousness.

The happiness of married life depends upon the power of making small sacrifices with kindness and cheerfulness. One doesn't have to be married to know that either.

CHAPTER VIII.—Continued

The Wynmouths were exactly the same type, —black-eyed, pale, anaemic, with lusterless thin, black hair, through which a bloodless scalp showed, blotchy; false teeth—no, not false—everyone could see what they were—artificial, rather—so white they were almost blue. They believed in hell and spoke of the "world" in a tone which implied both horror and contempt. They knew that Christ was coming soon to take His own out of the "world," leaving the other odd millions to their well-meeted punishment.

Mr. Wynmouth satisfied the Board that he believed in discipline for wayward girls—discipline, repented of, was the life of the school and lowly spirit. "And I said," Mr. Wynmouth, "my wife will be coddled by me entirely," at which Mrs. Wynmouth bowed her head and drew her thin lips more tightly over her blue mouth.

The Board breathed more freely. "It will be better now," said Dr. Singible, "and I think it would be well to have the pastors appeal to the ladies to have a series of teas to raise money for the additional school." I am sure the ladies will take care of it."

"It was to the Girls' Friendly Home (under the Wynmouth rule) that Helmí finally was committed. If she had been of the full age of eighteen years she would have been sent to jail.

The police matron, a silent woman, who held her job because she was no talker, came with her on the car. Helmí, with her head down, in a little green valise which Miss Abbie had given her, walked confidently down the path which led to the big oak door. The former matron's flowers bloomed at each side of her. They nodded a welcome to her, and she felt reassured and comforted. It must be a nice home where there were so many flowers. Helmí had put on her pleated skirt and white middy, which now had the monogram on it, just like the other girls. She wore it today, because it had always brought her a good time and was full of the vibrations of fun and fellowship. The Blue and Gold Book was in her valise, and her English learning book, too. She would be all right, and Miss Rodgers would come, and the girls, too.

Helmí had not yet quite lost hope. Mrs. St. John had come to help her when she was better. She still thought of her as she had last seen her, heavy-eyed, distressed, ill, and told herself over and over again that

"Good-bye, Helmí, be a good girl," she said, not without a degree of kindness. Her last delivery to the Girls' Friendly Home had pulled a half-head of hair out of her not too well covered head, so she felt kindly to Helmí.

Helmí wrote her name in the brown book. Mrs. Wynmouth showed her, quite proud of the fine big letters she was able to make. She wrote her address—*to Miss Abbie Moore, 52 Chestnut St., St. Paul.*

Mrs. Wynmouth admired her writing, "You can't even begin to imagine how I came to feel as weak and run-down that condition was to do my work." My head ached continually and I was so fatigued that I could cry from morning till night. I had another attack of rheumatism and I could not work.

"You will learn more here," said Mrs. Wynmouth, "all our good girls go to school. You like school?"

Helmí nodded.

"Now, dear I want to be your friend. I am a little mother to all the girls. I want you to tell me all about yourself."

Helmí told her about coming to Saint Paul—her aunt's death—her coming to Winnipeg—Miss Abbie Moore—the Girls' Club. Suddenly she stopped.

"Yes—e-e-?" Mrs. Wynmouth stretched the word out until it seemed like a surprised pr'y which would be sure to catch any club of girls.

"I had—had—said Helmí.

"Who sent you the medicine, dear?" asked Mrs. Wynmouth casually.

"I cannot tell," replied Helmí, looking her questioner straight in the eye.

"You mean you will not tell. Now,

the movement of the human eye is controlled by six muscles.

Helmí, trust me, I'm your little mother." She came over to the girl and laid her hand on her shoulder. Her touch made Helmí shiver, and when she heard nearer Helmí drew away with a start.

Mrs. Wynmouth drew her lips tightly over her two plates. "We'll see," she said, and Helmí knew it was a threat.

That night Helmí met the bigs at supper. The table had been turned diagonally across the room, to get greater length, and it had a clean cloth, although it was not Sunday; Mrs. Wynmouth had expected a visit from some members of the Board.

"Now, girls," said Mrs. Wynmouth, in her sweet way, after a long, bleeding had been called down from on high, "we have a new girl, Helmí Milander. She has come to us for a while, and I want you to be very good to her, and very kind. Let her know she is among friends here. Helmí and I have had a little difference already, which I wish to tell you about, or, to help her—I don't know—know what she means, and this she refuses to tell me. I never ceased to tell her the remains stubborn. Isn't she foolish, girls? I am here to help every girl, but the girls must let me. Isn't she foolish, girls?" she repeated.

"Yes, Mrs. Wynmouth," said the girls in chorus. But they said it listlessly. Those days of mourning for the other matron were not ended.

Then Mrs. Wynmouth proceeded to tell the story, the girls listening open-mouthed. A new girl's story was always interesting.

"Now we'll all pray that Helmí's stubborn spirit may be melted. You all pray, won't you girls?"

Helmí sat looking from one to the other helplessly. Had she not one friend anywhere?

Even slight after the evening meal those followed the orgy of prayer, when every girl who wanted to stand well with the matron prayed. Much of it was meaningless, but as the prayers went on a certain excitement had held on them, and in their supplications they forgot that other ears than God's were listening, and unconsciously they revealed many things. The Matron was hopeful that Helmí would sweep into the whirlpool of excitement, and would tell what she wanted to know. Helmí sat still and listened, but refused to pray.

(To Be Continued)

## From Personal Experience

New York Man Quite Convinced  
Scotch Art's Right

There is one man in New York who does not have to be convinced that the Scotch are "right." He knows it—from personal experience in Scotland.

This man is Alex Smith, the famous golf professional. And this is the story:

Last spring, when George Duncan, the Scotch golfer, was over here he visited Smith. And he not only wore Smith's favorite golf stockings—and other articles of his apparel—but wore holes in them. However, he said that when Smith visited him in Scotland he would show him the time of his life.

This summer Smith went to Scotland and visited Duncan. To entertain his American guest the Scotchman invited two attractive young ladies to dine with them. He ordered an expensive dinner, but when the waiter brought the check he passed it to Smith.

"We'll go fifty-fifty on this," he said, in all seriousness. I furnished the ladies and you pay the check," Smith admits he's "cured."

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

## Testing Big Scalples

The Westminster Gazette announces that the British ministry is trying out a 2,000-mile special seaplane development flight in the Baltic with a fleet of experimental flying boats—a exhaustive tests for naval and commercial transport work. It is hoped, the Gazette adds, that the tests will involve huge all metal serial battleships to act as the eyes of the fleet.

The movement of the human eye is controlled by six muscles.

FIVE ON PENINSULA IN CASPIAN SEA HAVE PEAK FEATURES

On the Mangishlak peninsula, in the Caspian Sea, there are five small lakes. One is covered by salt crystals strong enough to allow a man and horse to cross the lake on foot. An other is as round as any circle, and of a lovely rose color. Its banks of salt crystal form a setting, white as snow, to the water, which not only shows all the colors from violet to rose red, but from it also rises a perfume as of violet. Both the perfume and the color are the result of the presence of seaweeds.

USED BY PHYSICIANS—MINARD'S LINIMENT

FOR PRINTING PRESS

In order that the hot quickly a tree could be transformed into paper, the three trees near a large paper mill were recently cut down at 7:35 a.m., swiftly rid of bark, and pupped. They were then made into a roll of paper which was ready for use by a nearby newspaper at 9:34 a.m. The press began turning at once, and by 10 o'clock newsboys were selling the papers in the streets.

AIDS SETTLEMENT IN WEST

The Canada Colonization Association, a subsidiary of the Canadian Pacific Railway for the settlement of privately-owned lands in Western Canada, in the first six months of 1927 accounted for the placement of 402 families on 5,751 acres of land.

Girls admire promising young men, but everybody else prefers those who pay cash.

CUTICURA SOAP SHAMPOO

KEEP THE SCALP HEALTHY

Regular shampoos with a suds of Cuticura Soap and hot water preceded by light application of aromatic Ointment, are the secret. They do much to cleanse the scalp of dandruff, oily irritation, stimulate circulation and promote the healthy growth of hair.

Cuticura Soap Shampoo, \$1.00 per box. Cuticura Shaving Stick, 25¢.

EXPECTANT  
MOTHERS

Read Mrs. Menard's Letter.  
Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before I took it I came to feel as weak and run-down that condition was to do my work."

"I am a little mother to all the girls. I want you to tell me all about yourself."

Helmí told her about coming to Saint Paul—her aunt's death—her coming to Winnipeg—Miss Abbie Moore—the Girls' Club. Suddenly she stopped.

"Yes—e-e-?" Mrs. Wynmouth stretched the word out until it seemed like a surprised pr'y which would be sure to catch any club of girls.

"I had—had—said Helmí.

"Who sent you the medicine, dear?" asked Mrs. Wynmouth casually.

"I cannot tell," replied Helmí, looking her questioner straight in the eye.

"You mean you will not tell. Now,

DODD'S KIDNEY PILLS  
FOR ALL KIDNEY DISEASES  
RHEUMATISM, BACKACHE,  
DIABETES, BACKACHE,  
OBSTACLES, ETC.  
4087 THE FROST

and a half old and it gave me a lot to do. So I thought I would try Lydia E. Frost's Kidney Pills. I took them and had read so much about it that when my doctor asked me if I could eat in the little books, I found a difference right away as my head was relieved and my tired feelings gone. My doctor said it was good for me and she continued doing it, as she said it might set me back if I started to do it again. It sure did me good. I have taken the pills two bottles when my baby came. I am a fine big boy, now nearly five months old. I am taking your kidney pills now and I am doing my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as it gives great relief and help in those times."

Mrs. OLIVER MENARD, 24 Harvey St., Chatham, Ontario.

## New Home Ready

Prince Of Wales To Take Up Residence In Marlborough House

The Prince of Wales will go into residence at Marlborough House soon after his return from Canada.

Marlborough House, an almost square, solid red brick building, was built by Sir Christopher Wren just over 200 years ago for the first Duke of Marlborough. Later it became the residence of various members of the royal family, and finally was acquired for King Edward VII, then Prince of Wales.

The present Prince of Wales, will usually use only a small portion of the house himself. His suite will be on the first floor, which looks out on two acres of garden. A large room, which was formerly an audience chamber, will be converted into a combined reading room and study where the Prince will conduct the principal part of his correspondence.

On the ground floor is a large room which will be used for the entertainments of friends who are not of the Prince's intimate circle.

Queen Alexandra's boudoir and drawing room will remain exactly as they were in her day, as will also the four state rooms with their pictures and statuary. The same course was followed with regard to Queen Victoria. Rooms at Osborne House, Isle of Wight, where she died—although her death took place more than a quarter of a century ago and although Osborne House as a whole has been put to different uses—remain as they were in her lifetime.

Dr. Williams' Pink Pills

The test of any remedy lies in its acceptance and employment by the qualified medical practitioner. No less an authority than Dr. Andrew Amtel, physician to the Pan American Games, imploredism of the nervous system and disorders attributable thereto, strongly endorses Dr. Williams' Pink Pills.

Dr. Amtel's testimony reads as follows: "For several years I have used Dr. Williams' Pink Pills in my practice and I have always found them efficacious in the treatment of disorders due to impairment of the nervous system, animal and muscular spasms, neuralgias, retarded development in young women, and irregularities. There is no lack of tonic remedies, but in my experience none of them equal in efficacy to Dr. Williams' Pink Pills."

No more conclusive evidence of the value of Dr. Williams' Pink Pills could be asked for than that is found in the above endorsement of this noted European physician.

Dr. Williams' Pink Pills are the best, however, and most valuable and efficacious for more than a third of a century and have brought relief to thousands and thousands of weak and suffering patients.

Dr. Williams' Pink Pills provide for every conceivable variety of disease, constituting almost what is fiction and not to be classified, will come under dutiable items. The forty-nine specified under the department's ruling will probably all now be classified as unbound novels and be dutiable under the general tariff—which is applicable to United States as magazines."

The decision, in its formal language, holds that "for every publication, consisting almost wholly of fiction and not to be classified, will come under dutiable items. The forty-nine specified under the department's ruling will probably all now be classified as unbound novels and be dutiable under the general tariff—which is applicable to United States as magazines."

DR. WILLIAMS' PINK PILLS FOR ANNEAULIA, RHEUMATISM, NEURALGIA, NERVOSIS, AND SPASMODIC TROUBLES. Taken as a tonic, it will bring you into perfect physical condition and cultivate a resistance that will keep you well and strong. You can get these pills from your druggist, and send a post card to the manufacturer, enclosing 25 cents a box, a postage stamp, and mail at 50 cents a box to The Dr. Williams' Medicine Co., Brockville, Ont.

DR. WILLIAMS' PINK PILLS FOR ANNEAULIA, RHEUMAT

## A MASTERSPIECE

A young entrance pupil writing on the June examinations in composition got ten cents and it made him crazy. An editor never wants any pay for his paper and the people never think of paying an editor. When an editor subjects, he writes:

"An editor is a man who edits a paper. Some editors use a pen to advance. More people know how to write with, but some use scissors. edit a paper better than the editors. Lots of editors get news from scribes, do. If the editor asks for his pay for Some editors are Farisees. Nearly his paper the fellow gets mad, so it all editors lie. An editor that can't is cheaper to borrow someone else's. He ain't no good for an editor. An Some editors are not afraid of men editor should like gossip. Women I once knew a woman that frightened an editor and made him crawl under a table." (This boy is said to have

Mr. Sterling, of the Canadian Oils Co., Calgary, was in town yesterday. waved with honors.)

## INFANTILE PARALYSIS—

## ACUTE POLIOMYELITIS

The use of the term infantile paralysis is somewhat misleading, because although 95 per cent of these cases occur in children under 10 years, persons up to forty or fifty years may develop the disease. In rural communities a larger percentage of adults are affected during an epidemic; but there is a more important objection to the word "paralysis," for fifty per cent of cases of acute Poliomyelitis do not develop paralysis. That means that during the early part of an epidemic, before parents and doctors are on their guard, there are from one to four unrecognized potentially dangerous cases of Poliomyelitis present in the community for every case that is recognized.

Poliomyelitis is believed to be caused by a virus or poison. The incubation period, that is, the interval between the time of exposure of a susceptible person and the outset of the symptoms during which interval the virus is multiplying and is invading the system, appears to be under ten days, with an average of about six days.

In the sporadic cases the first evidence of illness is usually paralysis, but in the epidemic cases there is usually two phases—the first giving evidence of general infection. There may be fever, nausea, vomiting and headache. Quite commonly the patient suffers from inflammation of the upper air passages, manifested by sneezing, coughing and sore throat. Others may show only a passing indisposition. Another group may show signs of a gastro-intestinal disturbance, vomiting, diarrhea accompanied by some fever. In some cases the patient is markedly irritable. Pain in the back of the neck, and stiffness of and tenderness of the spine are common.

In fifty to eighty per cent of the cases the disease ends with this phase. In the remaining cases which develop symptoms of involvement of the nervous system, there is an interval varying from a few hours to several days, during which the patient appears to be considerably improved.

Then there appear the symptoms which show that the central nervous

## COWLEY HAPPENINGS

Mrs. A. Swart is a present visitor to Lethbridge.

Arthur Brockwell is a visitor to Vancouver at present.

V. S. Miller, of Spokane, is a business visitor in the district.

Mrs. Sandeman, of the Few Ranch, was a visitor to Clarendon recently.

Bruce Hodson, of Montreal, was in town Tuesday, renewing old acquaintances.

H. Dillon, of Dunmore, Alberta, is engaged as teacher of Todd Creek school.

Mr. and Mrs. Powell and children, who have spent several months in England, are now on their way back.

The repair work on the manse is now near completion. Rev. and Mrs. Griffith have moved in and the place shows a decided improvement.

The school fair has been called off, also the conference of the Women's Institute, churches, Sunday school and public gatherings of all kinds.

After three or four days of fine weather, wheat cutting is now general. The farmers have been much hampered by wet weather, five inches of rain having fallen this month to date.

A young Doukhobor girl of around two years of age, living two and a half miles from town, is suffering an attack of infantile paralysis. We understand that the child is slightly improving. As a result of this case, the school is closed and the villagers have placed themselves under self-imposed quarantine. This is rather hard on the youngsters, as they can't now gather in groups and play around the town, but they are taking advantage of the nearest means of this by climbing on the highest available buildings around their respective homes and shouting back and forth from the house tops, as it were.

## NATIONAL CONSERVATIVE CONVENTION AT WINNIPEG

The national Conservative convention is to be held at Winnipeg during the month of October. At a meeting held in Macleod on Friday night last, the following delegates were elected to represent Macleod federal constituency at that convention: John Heron, of Pincher Creek, defeated Conservative candidate in this riding at the last election; Hugh M. Shaw, of Nanton, former Unionist candidate for the Macleod constituency; J. R. Wall, of Claresholm; John Kerr, of Passegur, and J. D. Matheson, of Macleod, president of the Macleod Liberal-Conservative Association. The alternates chosen were Harry Gilroy, conductor, Macleod; J. E. Allison, of Granum; F. M. Morris, of Macleod; C. W. Stewart, of Claresholm, and Mrs. J. D. Matheson, of Macleod.

The meeting was largely attended and delegates from practically every district in the Macleod riding were in attendance.

When we buy at home, our town has both the money and the merchandise. When we send away, our town has only the merchandise.

system has been invaded.

Quite frequently at the onset of this stage, there are some involuntary twitches, but of course the most striking feature is the development of paralysis. A leg may be affected or a leg and arm. Again there may be only one group of muscles affected. The paralysis may be progressive, one group of muscles after another becoming involved, but as a rule after paralysis has appeared, "if there is no increase in six to twelve hours no further advance is expected." The extent of the external manifestations is of course indication of the extent of the involvement of the central nervous system.

Hyper-sensitivity of the skin of the affected limb is frequently noted and pain in various parts of the body is a common accompaniment.

## PRIZE AWARDS AT THE BELLEVUE EXHIBITION

The attendance at the tenth annual exhibition of the Bellevue and District Horticultural, Industrial and Poultry Society exhibition on Labor Day exceeded all previous records and judging by the number of entries and the interest in the added feature of poultry, it is likely two days, instead of one, will be required for the exhibition next year. There were considerably more entries in the vegetable section than last year and the exhibits were of a superior quality. There were not quite so many entries in the flower section, due, it is said, to the windy weather having damaged the flower gardens shortly before the exhibition date. Poultry shown were of a good type, but many recommendations for improvement for another season were made by the judges. Some splendid entries were found in the ladies' section, and the arts and industrial exhibits were works of considerable merit, especially in the painting classes. In this connection, general satisfaction was felt in the judging of Mr. Muncester, of Blairmore, who was quite capable of filling the position of judge.

Judges were as follows: Flowers, Mr. W. R. Reader, superintendent of parks, Calgary; vegetables, Mr. Palmer, of the experimental farm; Lettuce; poultry, Mr. Scholes; ladies' section, Mrs. W. R. Reader, of Calgary, and Mrs. L. L. Morgan, of Blairmore; arts and industrial section, Mr. Eric Muncester, of Blairmore.

Prizes were awarded as follows:

## VEGETABLES

Best Garden Display of Vegetables—1st G. W. Goodwin, 2nd T. Clayton. Best Collection of Vegetables—1st G. W. Goodwin, 2nd A. Hallworth, 3rd J. Curry. Round White Potatoes—1st and 3rd H. Blake, 2nd S. Humble. Round Colored Potatoes—1st S. Humble, 2nd G. W. Goodwin, 3rd E. Cole. Kidney White Potatoes—1st and 3rd J. Gerrard, 2nd E. Cole. Kidney Colored Potatoes—1st, 2nd and 3rd E. Cole.

Collection of Potatoes—1st, 2nd and 3rd E. Cole.

Cauliflower—1st G. Christie, 2nd G. W. Goodwin, 3rd G. Coupland.

Conical Cabbage—1st G. W. Goodwin, 2nd G. Coupland, 3rd L. Mottl.

Flat Cabbage—1st L. Mottl, 2nd J. Curry.

Round Cabbage—1st R. T. Johnson, 2nd J. Cousins, 3rd G. Coupland.

Savoy Cabbage—1st G. W. Goodwin, 2nd T. Clayton.

Red Cabbage—1st G. W. Goodwin, 2nd L. Mottl, 3rd D. Morris.

Curly Kale—1st and 2nd J. Boyle, 3rd T. Clayton.

White Kohl Rabi—1st A. Hallworth, 2nd C. C. Miller, 3rd J. Boyle.

Blue Kohl Rabi—1st J. Boyle, 2nd G. W. Goodwin, 3rd T. Clayton.

Swede Turnip—1st G. W. Goodwin, 2nd E. Cole, 3rd H. Robinson.

White Turnip—1st E. Cole, 2nd G. W. Goodwin, 3rd T. Clayton.

Yellow Turnip—1st J. Curry, 2nd and 3rd T. Clayton.

Manager: "Vot? You come into ze famous restaurant, drink ze glass of water an' walk calmly out?"

Jock: "Hoots mon! Did ye expect me to stagger out?"

## The Forgotten Island of Romance

1-The Settlement at Tristan da Cunha. 2-The only access to the sea. 3-Canadian Pacific Empress of France.

Interest on both sides of the Atlantic has recently been aroused by the re-discovery of the forgotten island of Tristan da Cunha, off the coast of South Africa.

Thus the place is invested with the magic spell of a Treasure Island, and the question is raised whether it can be found within its bounds to be found a rich hoard of doubleboar moidores, coins of eight or ten dollars. When this is known, not Lambert, the captain of the vessel, need be worried.

Tristan is blown by the wind from every solitary island; and the romance of the island is in the stories of the few inhabitants of its rock-bound shores and the experiences of those who have left their homes to find shelter. These are to be found wealth of pirate treasure. The island is distant from the nearest neighbor, St. Helena, of Napoleonic memory, by 1500 miles and is far from the path of any rare, indeed receiving a visit from a great ship only once beyond the horizon, a world which marching along the highway of progress has all but forgotten that out of sight lies the desert of the South Atlantic Ocean.

In 1817 when, on the withdrawal of Great Britain, an English garrison occupied this stormy island, there they found three Americans one of whom, Jonathan Lambert, "of Salem, a citizen and mariner thereof", was reported to have been a buccaneer. As a pirate he ran up to form somehow escaping the yard arm to which he had been bound by his captors. He was captured and became a slave to the island, where he was a buccaneer navigator whose name was the island bear. This was in the year 1816.

The continuous occupation of Tristan da Cunha began, however, in 1851 when, on the withdrawal of Great Britain, a British garrison was sent to the island. They found three Americans one of whom, Jonathan Lambert, "of Salem, a citizen and mariner thereof", was reported to have been a slave to the island, where he was a buccaneer navigator whose name was the island bear. This was in the year 1816.

## Making a Convenience of a Business

Many there are who make of a legitimate and well-established business nothing but a convenience—a place from which to get odds and ends when there is no time to go farther afield. They do not hesitate to send their money away for many things they need, and which could just as satisfactorily and much more promptly be supplied by their home merchants and dealers. No business, no matter of what nature, can long exist on this sort of patronage. The public expect to receive services as and when they demand it; but many do not do their part in making this possible.

There are manufacturing industries with fairly complete equipment which, because of such lack of consideration, are idle much of the time. It must be patent to all that a busy plant can be operated much more cheaply than one which is working only on part time. Therefore, it should be the policy of all to place their business of whatever kind it may be with the local plant or factory to the end that it may be kept reasonably busy and thus be in a position to give its best service.

When it is printed matter of any kind, remember the plant and equipment of

### Not So Bad—Yet Not So Good

"Sam, where been?"  
"No place—just married."  
"That good."  
"Not so good. I've stepped to nine kids."  
"That bad."  
"Not so bad—got plenty Jack."  
"That good."  
"Not so good—he'd hit on it tight."  
"That bad."

### "Not so bad—owns a big house."

"That good."  
"Not so good—it burned down last night."  
"That too bad."  
"Tain't so bad—she burned with it."  
"That good."  
"Yea—that good."—Selected.

One little town in California has gained 463 per cent in population since 1920.

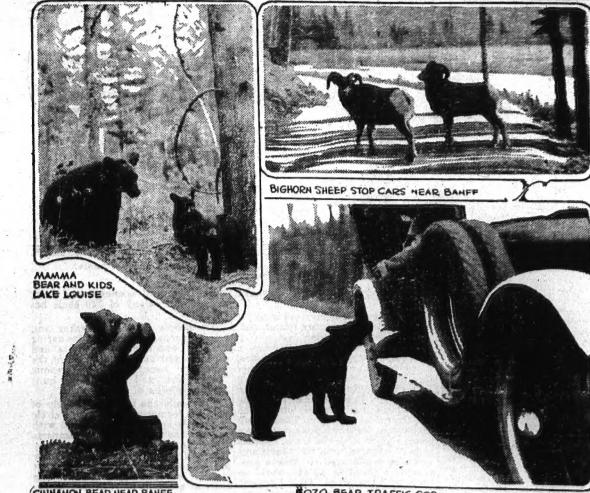

### Where Light Was Needed

The stingy farmer was scoring the hired man for carrying a lighted lantern to call on his best girl.  
"The idea," he exclaimed. "When I was courting I never carried no lantern, I went in the dark."

"Yes," said the hired man, sadly.  
"and look what you got."—Ex.

## Wild Animals Friendly on Banff-Windermere Highway

"The Friendly Road," by David Grayson, which is well-known to many lovers of nature, depicts incidents and friendliness of people along country roadsides in the rural districts. This is, however, not unique in the Canadian Rockies the friendliness of which is not due to mortals as in Grayson's book, but to the friendliness of animals. Animals are termed wild, but in this instance a word that cannot be applied to those on the Banff-Windermere Highway, a road that which runs from Banff to Lake Windermere, in the Columbia River Valley. The distance of 104 miles is a short distance and the scenes are continually changing. The views from the high passes looking down into valleys, thousands of feet below, tiny lakes surrounded by al-

pine meadows, rivers crossed and re-crossed, and glimpses of cascades tumbling down slopes from dizzy heights are intriguing and beautiful.

To this natural beauty is added another scene—the friendliness of the natural haunts. Rocky Mountain sheep are seen on the road alone. They are so tame that often motorists have to stop to let them pass, almost to the point of danger.

Bear are seen, also, on this famous highway, though not as often as other animals. They are regular visitors to Banff and are frequently seen on the streets of the village.

There are hundreds of miles of smooth motor roads through the Rockies and dozens of the open roads are visited this season in increasing numbers annually.

Show his friendliness. Sometimes he has lunch invited to him and the ranks of "friends old and new, old fellow," please him tremendously, and he will try to come even nearer. Bozo no doubt had many dreams during the winter of summer tourists and possibly imagined in true bear fashion just how to get the most out of the tourist season.

Bear are seen, also, on this famous highway, though not as often as other animals. They are regular visitors to Banff and are frequently seen on the streets of the village. There are hundreds of miles of smooth motor roads through the Rockies and dozens of the open roads are visited this season in increasing numbers annually.

### DARWIN RIGHT IN THEORY

Leeds, England, Sept. 1.—Taking as his subject the formidable text, "Darwin's Theory of Man's Descent as it stands today," and giving him an antiquity of one million years, Prof. Sir Arthur Keith delivered last evening the inaugural presidential address here of the 96th annual gathering of the British Association for the Advancement of Science.

"The subject of my address is man's remote history," said the distinguished scientist, whose "Antiquity of Man" is a standard work, and whose most recent publication, two years ago, was "Religion of a Darwinist." "Fifty-five years," he said, "have come and gone since Charles Darwin wrote a history of man's descent. How does his work stand the test?

"As I address these words to you, I cannot help marvelling over the difference between our outlook today and that of the audience which Sir Richard Owen had to face in this city sixty-nine years ago. The vast assemblage which confronted him was convinced that man had appeared on earth by a special act of creation; whereas the audience which I now have the honor of addressing, and that larger radio congregation within the reach of my voice, if not convinced Darwinists are yet prepared to believe, when full proofs are forthcoming, that man began his career as a humble primate animal and has achieved his present estate by the action and reaction of biological forces which have been and are ever at work within his body and brain.

"Will Darwin's victory endure for all time? Before attempting to answer this question, let us look at what kind of book the Descent of Man is. It is a book of history—the history of man, written in a new way—the way discovered by Charles Darwin. He gathered historical documents from the body and behavior of man and compared them with observations made on the body and behavior of every animal which showed the least resemblance to man. He studied all that was known in his day of man's embryological history and differences in the corresponding histories of other animals. He took into consideration the manner in which the living tissues of man react to disease, to drugs and to environment; he had to account for the existence of diverse races of mankind. By a logical analysis of his facts, Darwin reconstructed and wrote a history of man.

"Fifty-six years have come and gone since that history was written. An enormous body of new evidence has been found upon us. But the fundamentals of Darwin's outline of man's history remain unshaken.

"The evidence of man's evolution from an apelike being obtained from a study of fossil remains is definite and irrefutable, but the process has been infinitely more complex than was suspected in Darwin's time. In our original simplicity we expected, as we traced man's backwards in time, that we should encounter a graded series of fossil forms—a series which would carry him in a straight line towards an anthropoid ancestor. We should never have made this initial mistake if we had remembered that the guide to the world of the past is the world of the present. In our time man is represented not by one but by many and diverse races—black, brown, yellow and white; some of these are rapidly expanding, others are rapidly disappearing. Our searchers have shown that in remote times the world was peopled, sparsely it is true, with races showing an ever greater diversity than those of today, and that already the same process of replacement was at work to unravel man's pedigree. We have had to thread our way, not along the links of the chain, but through the meshes of a complicated network.

"Darwin himself approached this problem as a psychologist and after years of observation succeeded in convincing himself that immeasurable as are the differences between the mentality of man and ape, they are of degree, not of kind. Prolonged researches made by modern psychologists have but verified and extended Darwin's conclusion. No matter what line of evidence we select to follow—we reach the conviction that man's brain has been evolved from that of an anthropoid ape and that in the process no new structure has been

anthropoid apes. We ought to have been prepared to find, as we approached a distant point in the geological horizon, that the forms encountered would be as widely different as are the gorilla, chimpanzee and orang and confined, as these great anthropoids now are, to limited parts of the earth's surface.

"That is what we are now realizing; as we go backwards in time, we discover that mankind becomes broken up, not into separate races in the world of today, but into numerous and separate species. When we go into a still more remote past they become so unlike that we have to regard them not as belonging to separate species, but different genera. It is amongst this welter of extinct fossil that we have to trace the zig-zag line of man's descent. Do you sometimes falter and follow false clues?

"We committed still further blunder when we set out on the search for man's ancestry; indeed, some of us are still making it. We expected that there would be not only an orderly file of stages, but that every part of his body—skull, brain, jaws, teeth, skin, body, arms and legs—would at each stage become a little less ape-like, a little more man-like. Our researchers have shown us that man's evolution has not proceeded in this orderly manner. In some extinct races, while one part of the body has moved forward, another part has lagged behind.

"All the evidence now at our disposal supports the conclusion that man has arisen as Lamarck and Darwin suspected, from an anthropoid; apes not higher in the zoological scale than a chimpanzee and that the date at which human and anthropoid lines of descent began to diverge lies near the beginning of the miocene period. On our modest scale of reckoning, that gives man the respectable antiquity of about one million years.

"Our geological search has not produced so far the final and conclusive evidence of man's anthropoid origin; we have not found as yet the human 'image' emerging from its anthropoid encasement. Why, then, do modern anthropologists share the conviction that there has been an anthropic stage in our ancestry?

"Early in the present century, Prof. G. H. F. Nuttall, of Cambridge University, discovered a trustworthy and exact method of determining the affinity of one species of animal to another by comparing the reactions of their bloods. He found that the blood of man and that of the great anthropoid apes gave almost the same reaction. Bacteriologists find that the living anthropoid bodies possess the same susceptibility to infections and manifest the same reactions, as does the body of man. So alike are the brains of man and anthropoid in their structural organization that surgeon and physiologists transfer experimental observations from the one to the other. We find the same vestigial structure—the same evolution any postmarks in the bodies of man and anthropoid. The anthropo's mother fondles, nurses and suckles her young in the human manner. This is but a tithe of the striking and intimate points in which man resembles the anthropoid ape. In what other way can such a myriad of coincidences be explained except by pronouncing a common ancestry for both?

"In the anthropoid brain are to be recognized all those parts which have become so enormous in the human brain. It is in the expansion of those parts which has given man his powers of feeling, understanding, acting, speaking and learning.

"Darwin himself approached this problem as a psychologist and after years of observation succeeded in convincing himself that immeasurable as are the differences between the mentality of man and ape, they are of degree, not of kind. Prolonged researches made by modern psychologists have but verified and extended Darwin's conclusion. No matter what line of evidence we select to follow—we reach the conviction that man's brain has been evolved from that of an anthropoid ape and that in the process no new structure has been

introduced and no new or strange faculty interpolated.

"In these days our knowledge of the elaborate architecture and delicate machinery of the human brain makes rapid progress, but I should mislead if I suggested that finality is in sight. Far from it. Our enquiries are but begun. There is much we do not yet understand."

After sketching the advancement of scientific knowledge since Darwin's time, Sir Arthur Keith concluded:

"With such sources of knowledge being ever extended, and others of great importance which have been left unmentioned, such as heredity, we are justified in the hope that man will be able in due time not only to write his own history, but to explain how and why events took the course they did.

"Was Darwin right when he said that man, under the action of biological forces, which can be observed and measured, has been raised from a place among the anthropoid apes to that which he now occupies? The answer is 'Yes,' and in returning this verdict I speak but as foreman of the jury—jury which has been empanelled from men who have devoted a lifetime to weighing the evidence."

### Here and There

One year from date of publication in the Canada Gazette new regulations requiring the inspection and grading of fruit for exportation were introduced. They provide that all fresh fruit must be inspected and an export inspection certificate issued showing the grade before leaving the country.

A record was established at Quebec recently, with nine passenger vessels arriving and leaving the port ever to visit the port at any one time. Included in the arrivals were the "Empress of Scotland," "Empress of Moncton," "Marloch" and "Meldred" of the Canadian Pacific Steamships.

A new high record of \$15,824,821 in gold production of the province of Ontario during the first half year is shown in the report just out, the increase over the same period of the previous year a quarter of a million. During the same half year the total production of all minerals in Ontario was \$45,102,228, as against \$42,583,402 for the same half year in 1926.

To serve the interests of hundreds of farmers in Southern Saskatchewan, two new branch lines of the Canadian Pacific Railway started operation on September 1st, according to announcement by D. C. Collier, general manager. One is longer of the two lines run from Assiniboine south to Coronach, a distance of 59 miles, and the second, a 27-mile stretch, runs from Broomhead to Lake Alma.

The 100 members of the British Newspapers' Society left Canada yesterday morning for the opportunities Canada possesses. Their impressions are that Canada was already great and is potentially much greater, and they were amazed that such could have been accomplished in Canada in such a short time by so few people. They sailed from Montreal on the Canadian Steamship "Montclare," the ship having a large passenger list.

After a strenuous six weeks travel across the Dominion of Canada, their Royal Highnesses, the Prince of Wales and his brother George embarked on the Canadian Pacific steamer "Empress of Scotland," fired but happy. Prince Edward says, "Every time I come to your country I am more and more attracted by the natural beauty and the warmth of the welcome extended by Canadians, and trust that it will not be long before we meet again."

Approximately 1,000 members of the American Legion visited Montreal on their way to Paris, France, where they will hold their annual convention. The people came from Idaho, Buffalo, Wisconsin, Washington, Montana and North and South Dakota. Frank K. Schwall, mayor of Buffalo, gave the Legionnaires a tour of the city a wild buffalo to be presented to the citizens of Paris. They crossed to Antwerp, Belgium, via the "Montreal" and "Montroyal," both liners in the Canadian Pacific service.

"A land of good wages and unlimited possibilities," is the manner in which Premier Stanley Baldwin characterized Canada in his first public address to the Canadian Legislature, return from the Dominion. Ninety-five per cent of the men (of whom we hear too much) who go out to the Dominion and return are willing to stay there themselves. I have no doubt that a man can succeed on the land there even if he has not been brought up in the country at home. A little training will go a long way."

That the various liquor control boards of Canada have been defrauded by having purchased liquor through certain agencies bearing manufacturers' brands but labelled in Canada and evidently mixed and bottled in Canada has been disclosed.

## INFANTILE PARALYSIS

Infantile Paralysis is a germ disease. It occurs most often in the summer months, and mostly among children, especially those under five years old. Following the advice given below will help your children escape the disease.

Infantile Paralysis in its beginning resembles many other contagious diseases. A child that has been perfectly well becomes restless or drowsy; is irritable and does not want to be moved. There may be vomiting or diarrhoea, but constipation is the rule. There may be some headache or pains in the muscles. At times a convulsion occurs. The child is feverish. That is all that appears, and yet within twenty-four to seventy-two hours the child may not be able to move its arms or legs.

Do not wait for the paralysis. If the child appears to have fever, vomiting, and marked restlessness, put him to bed and call a doctor promptly. No matter how mild the sickness may seem, get a doctor's advice. Do this to protect your child. While waiting for the doctor, give the child a dose of castor oil. Keep all other children away until the doctor says there is no danger.

Every case of Infantile Paralysis should be reported immediately to the Board of Health. Follow the advice of your Health Officer, who is working to protect your home from Infantile Paralysis and all other contagious diseases.

## GENERAL INSTRUCTIONS

Keep your children clean. Bathe them often. Make them wash their hands and face before eating. Do not let them use public roller towels.

Give each child his own handkerchief. Teach him to blow his nose and to cover the nose and mouth when he sneezes or coughs. Teach him to keep his fingers out of his nose and mouth.

Give each child his own toothbrush. See that he uses it morning and night. Keep the teeth clean and have the cavities filled.

Teach him never to use a cup or glass that has been used by someone else.

Give the child plenty of water to drink. Forbid all tea and coffee.

Food should be simple and easily digested. Give no fried foods.

Use clean, pasteurized milk, or milk from cows tested regularly for tuberculosis.

Put the children to bed early. Younger children should have a nap after lunch. Be sure that the children's bowels are regular.

Do not use patent medicines. Bags of camphor or asafetida are useless.

Beware of the dishonest advertisements of quacks who are interested in your money, but not in your children.

Keep children away from crowds. Allow them to play outdoors as much as possible, but not in contact with large groups of other children. Keep them by themselves as far as possible.

The home should be kept thoroughly clean, and free from fleas or vermin of any description.

Keep the home free from dust, but avoid dry sweeping and dusting. Sprinkle the floor with pieces of dampened paper before sweeping, and use a cloth which has been moistened for dusting.

Inasmuch as there is a great variation in the onset of poliomyelitis, at a time when the disease is prevalent, children showing any evidence of a departure from normal health should be carefully watched and isolated. It is urgent that prompt medical attention should be given in all cases.

The abortive or very mild types of the disease which recover in a few days without any paralysis, and the carriers who harbor the virus of the disease in the nose and throat but do not develop the disease, are now known to be most important factors in the spread of infection and render the control of the disease an extremely difficult problem.

In patients suffering from the disease, careful attention should be given to the prompt disinfection of all nose, throat and bowel discharges,

## SETS FORTH CANADA'S MINERAL RESOURCES

WINNIPEG, Sept. 19.—While the world is recording a decrease in the production of gold, Canada is gradually showing an increase and is rapidly reaching second place as a source of supply; it is stated in a new publication covering mines and mineral resources of the Dominion of Canada, now being issued by C. Price-Green, F.R.G.S., commissioner, department of natural resources for the Canadian Railways.

The booklet, which is now available for distribution, deals extensively with the mineral resources of the Dominion, both metallic and non-metallic and points out that: "The value of our mineral production has risen from less than 22 million dollars to over 241 million dollars in 1926; our water-power development, the potent force behind our mining, pulp and paper and general industrial development, has risen from a few thousand horse power to 4,566,000 horse power; the export of pulp and paper, from practically nothing to 173 million dollars; and our foreign trade from 221 million dollars to over 2000 million dollars, representing the largest per capita export in the world. Many other examples could be given, but these alone explain why Canada's progress is inspiring so much confidence in investors at home and abroad."

Dealing with the pre-Cambrian Shield, which stretches from Labrador almost to the basin of the Mackenzie, the introduction to the booklet states "The major portion of this country is unexplored and unprospected; still sufficient is now known of its geological structure to provide evidence of its latent wealth. The copper-gold deposits of north-western Quebec; the nickel-copper mines of Sudbury; the silver of Cobalt, South Lorraine, Miller Lake and Gowganda; the gold of Porcupine, Kirkland Lake and areas contiguous in the provinces of Manitoba and Quebec; the iron, gold, silver and other ores of Thunder Bay and Rainy River mining districts; copper, gold and various other minerals in The Pas district of Manitoba, all give some idea of what the future holds in store for Canada, within the folds of this great region—the greatest single exposure of pre-Cambrian rock in the world—greater than all others combined. In view of what is said in the foregoing as to the nature of the Archean Shield, it is, indeed, probable that phenomenal discoveries will continue to be made from time to time. It must be borne in mind that at present only a minimum of work has been done by men who have, more or less, rapidly covered the continent contiguous to its waters."

Yesterday, the Rev. W. H. and Mrs. Muncaster, formerly of Blairmore, now of Calgary, celebrated their golden wedding. Owing to the infantile paralysis epidemic, their son, Mr. Eric Muncaster, was unable to attend.

Five carloads of silk being shipped east from Vancouver, rolled into the Fraser river when a train wreck occurred. The five cars carried silk worth \$1,500,000.

News of the big Tunney-Dempsey fight should be reaching Blairmore around eight o'clock tonight.

and to articles soiled therewith.

When the disease is prevalent all children known to be ill and not receiving medical attention should be reported to the local Board of Health.

The quarantine period in poliomyelitis is three weeks from the onset of the infection. Exposed children of the household and adults of the household whose vocation brings them into contact with other children, or who are food handlers, should be quarantined for fourteen days from last exposure to a recognized case.

## MAIL ORDER SYSTEM THAT IS A NUISANCE

The High River Times refers to the latest plan of working a mail order game as follows:

Newspapers in other communities are giving publicity to the salesmanship pest, that has annoyed people in Swift Current for some time. Reference is made to the practice of sending articles through the mails, unorderly, with an accompanying letter either to return the goods or remit the amount of invoice attached. Ties, silk stockings, and cosmetics are the most common. Mostly the goods are cheap and shoddy, a disguise for the reasonable price asked.

The public is advised that it is unnecessary to pay attention to the letters asking for return of the goods. A person is within legal right to inform the sender that he must call and get them.

The practice is annoying, however, and there seems to be a desire to offer some sort of retaliation. The post office department is helpless in the matter, as it can only act if the unorderly goods/are sent C.O.D.

A farm paper, according to Printer's Ink, has found a way to make it possible for the public to go a considerable distance in ending this nuisance. The power is in the public's hands. When unorderly goods are received the long-suffering citizen should acknowledge receipt. In the same letter he should specifically state that they are placed in storage awaiting the call of the owner and then should quote his storage rates—which he, of course, is free to fix of his own accord. After making this statement he should plainly indicate that when goods have been held for a certain length of time they will be sold to cover storage. There is no doubt that the general adoption of this plan will quickly end the career of this widely practised form of "pest salesmanship."

## A PUBLIC WARNING

A communication has been received by the local branch of the Canadian Legion with reference to a so-called "Veteran's Jubilee Bouquet Committee," operating out of Toronto.

It appears that a silk emblem is forwarded containing the crest of each province, and it is expected that at least \$5.00 will be forwarded in payment. This committee is a private money-making concern using the name of disabled veterans to obtain sympathy and extend the sales.

At a recent meeting of the Canadian Legion a resolution was passed resenting such methods being used in depriving the disabled veterans of a livelihood, and in order to protect their more unfortunate comrades, request the public to note that all products of the disabled soldiers bear the word "Veteran," these goods being manufactured in the Red Cross workshops for the sole purpose of assisting those maimed in the Great War.—Fernie Free Press.

## WOULD SUBMIT TO ELECTROCUTION TO END CONTROVERSY

Copenhagen, Denmark.—A young Danish author, Thorild Barford, offered to submit himself to electrocution in the same way and with the same current used in the electrocution of Sacco and Vanzetti. He desires to prove that electrocution does not kill. The offer was published in the newspaper Politiken. It resulted from a controversy now raging in Denmark over the declaration of Dr. Claudius, Danish scientist, that electrocution does not end life, but that death is caused by the physicians after the electrocuted man is taken from the chair.

Barford made his offer on two conditions: That a physician be present to revive him from the electric shock and that newspapermen be present to assure fair play.

[The above is reproduced from literature supplied by the Metropolitan Life Assurance Company and distributed through the agency of the Red Cross.]

## BLAIRMORE UNITED CHURCH

Rev. J. W. Smith, Pastor

Serve the Church that the Church may serve you.

Services for Sunday, September 25th, the Pastor in charge.

MORNING SCHOOL at 11 o'clock.

The subject for the senior classes is "The Romance of Missions."

AFTERNOON SCHOOL at 2. After the lesson is taught, another letter either to return the goods or remit the amount of invoice attached.

Ties, silk stockings, and cosmetics are the most common. Mostly the goods are cheap and shoddy, a disguise for the reasonable price asked.

EVENING WORSHIP at 7:30. The service of praise will be led by the Senior Choir. The message for the evening will be Henry Van Dyke's "The Mansions." Miss Theresa M.

Siegel, of Calgary, will render this matchless literary gem in such a way that its great religious appeal will be brought home to every one present.

In harmony with this message, Mrs.

Bannan will sing "One Sweetly Solenn Thought."

We are expecting the church to be filled to capacity and would suggest that you come early. This will help the ushers to place extra chairs, should they be necessary, before the service commences.

The visit of Miss Siegel to Blairmore is an event towards which we are looking with much interest.

On Monday evening she will give a selection of Dramatic and Humorous recitals. Be sure to come, and bring your friends. The following is the programme for the evening:

Chairman's address, Rev. J. W. Smith.

Pianoforte solo by Miss Alice Hornquist.

1. "Watch the Corners," Anon.

2. "Aunt Eliza on Automobiles,"

3. "Western Logic," Brown.

4. "Goods for Sale," Werner.

Solo by Mrs. J. A. Kerr.

Solo by Mr. R. W. H. Pinkney.

5. "Black Thunder," a story of an outlaw horse, Wilson.

6. "Miss Amelia's Colored Lochinvar," Werner.

Violin solo by Mr. Eric Hornquist.

Solo by Miss Enid B. Cole, of Bellevue.

7. "Danny," story of a little Irish lad, Daly.

8. "Ninety and Nine," Dunbar.

9. "Naming the Family," Anon.

Solo by Mr. J. R. Gresham.

10. "The Woman Who Was Forgotten," Anon.

11. "At the Photographers," Noble.

"God Save The King."

Church Night on Wednesdays at 7:30 p.m.—Last night Mr. Smith began a series of studies on the Lord's Prayer. The subject was the challenge of Christ to faith. This was an introductory study and will be followed by more detailed studies each Wednesday night. The next study being "The Abode of the Father."

The lecture and social held on Monday evening, while only fairly well attended, was enjoyed by all present. Mr. Smith's lecture and pictures on Dr. Grenfell and his work on the Labrador coast was very instructive and greatly enjoyed. The auction sale of the fruits and vegetables, which were donated for the Harvest Home, was held at the close of the lecture, the auctioneer being Mr. R. Dicken, who with his ever-ready witicism kept the bidders in good humor and the sale netted upwards of \$20.00. The ladies supplied refreshments, thus bringing to a close a most enjoyable evening.

At the morning and afternoon Sunday schools on Sunday next, promotion services will be held. The classes have now been graded and scholars will be introduced into their new classes and groups.

The ladies of the church wish to thank all those who helped in any way to make the tea. Mrs. Greig's residence such a success. They appreciated very much the loan of the various cars for transportation and especially Mr. and Mrs. Greig for the use of their residence for this occasion.

The ladies of the church wish to thank all those who helped in any way to make the tea. Mrs. Greig's residence such a success. They appreciated very much the loan of the various cars for transportation and especially Mr. and Mrs. Greig for the use of their residence for this occasion.

Teachers and those interested are again reminded of the special courses of study, which will commence on Friday, tomorrow evening, at 8 o'clock.

## DOUKHOBORS TO ASK INCOME TAX RELIEF

REGINA, Sept. 17.—When the exchequer court sits here today it will hear the claim of the Doukhobor community of Veregin to be relieved of a levy of \$43,586 by the minister of customs and excise in respect to income tax.

The Doukhobors claim that they are entitled to set off against income the wages of their members, and that being the case, there is no income left which is taxable. The Doukhobors claim that the tax is fixed upon returns made by the community and that wages are not collectable by members except in the case of severance from the community. The

## IN MEMORIAM

## IN LOVING MEMORY

of

FRANCIS LOTE,

Killed at Hillcrest September 19, 1926

"Deep in our hearts there's a picture  
Of a loved one gone to rest,  
In memory's frame we shall keep it,  
Because he was one of the best.  
Our hearts cannot tell what to say,  
God only knows how we miss him,  
As we journey along on life's way."

—Inserted by Mrs. F. Lote and Family.

claim is in respect of the years 1917-18-19.

## Fight the Fire Fiend

The week commencing October 9 has, by proclamation published in the Official Gazette in Ottawa, been declared "Fire Prevention Week" throughout Canada. The object is, of course, to focus public attention upon the enormous losses, both life and property, resulting from fire with a view to the adoption of more effective measures to prevent fires and to educate all people, and especially children, against habits of carelessness in the handling of matches, gasoline and other combustibles, and in the disregard of common sense methods in the matter of extinguishing camp fires, and such simple matters as throwing away the still lit light stubs of cigars and cigarettes.

At first glance it would seem to be quite unnecessary for the national government to officially send one week out of every fifty-two for the purpose of teaching a presumably intelligent, educated and business-like people to safeguard their own lives, homes and property from destruction. Unfortunately, Canada's fire record proves conclusively that it is only too necessary to keep up a persistent campaign to awaken the people from their carelessness and indifference in this very vital matter.

Canada, which is so progressive, in many ways, and has taken the leadership in numerous worthwhile movements, and can claim the honor of achievements, occupies a low place among the nations of the world when statistics of fire losses are studied. Few countries, if, indeed, any one, annually record the appalling fire losses which take place in Canada. This Dominion's fire loss per head of population is about the highest in the world, and the passing years do not reveal much improvement.

Canada has already sustained the loss not merely of millions, but actually billions of dollars worth of forest wealth, some of which is gone forever; and where long periods of time will be required to make good the loss in other districts. And these forests are one of Canada's greatest assets, —one of the principal factors today, and for the future, in building up the Dominion's greatest industrial enterprises and providing a very large percentage to the Dominion's export trade.

The fire loss of taken annually, is, almost daily told of human life, as well as leaving behind it a trail of lifelong suffering and economic loss in blighted and crippled humanity.

Because of the high rate of fire losses, the people of Canada have to pay abnormally high rates for fire insurance. The insurance companies are not to blame for demanding high premiums. They must protect themselves and their policyholders, and just as long as fires in Canada remain so numerous and costly, so long will the cost of insurance against fire remain a heavy drain upon the business of the Dominion.

Then, too, there is the further heavy burden imposed upon all urban communities in the maintenance of elaborate and expensive fire-fighting equipment, and large expenditures to augment water supplies for fire-fighting purposes greatly in excess of the daily domestic requirements of cities and towns.

All these forms of protection are necessary, and must be paid for in our tax bills. But because of the frequency of fires largely the result of carelessness and neglect of the most ordinary precautions on the part of many people, these services have to be maintained on a much more extensive and expensive scale than would otherwise be necessary.

Fire Prevention Week should, therefore, be observed all over the country. Special attention should be paid to the subject in all schools, while each individual householder should devote a little time to a thorough examination of his premises and make a close check-up of conditions in and around all buildings. Rubbish should be cleared away, unneeded stored papers, unused garments, old supplies discarded, and every member of the family cautioned to exercise the greatest care in handling of matches and all combustible materials, lighted lamps, and in the making and extinguishing of fires. Finally, all property should be adequately insured notwithstanding all precautions that may be taken.

Attention to these important matters now may save much loss and suffering in the future.

### Giant Dirigible Damaged

**Expansion Of Gas Through Weather Conditions Caused Peculiar Incident**

A peculiar accident to the giant dirigible Los Angeles occurred while the huge airship was moored at her mast in Lakehurst, N.J. The temperature rose suddenly, causing the helium gas in her containers to expand rapidly, and the wind shifted 180 degrees in a few seconds. The result was that the ship threw her stern high into the air, almost at an angle of ninety degrees, and whirled around with the sudden change in the wind. The temperature went back to normal rapidly, so that the gas as-

sumed its normal volume and the tail of the ship dropped down. Meanwhile, however, loose gear in the ship was thrown about, causing some damage.

### French Use Bicycles

**Report Shows They Out-Number Automobiles Ten-To-One**

The number of bicycles in use in France in 1925 amounted to 7,112,900, an increase of 5 per cent over 1925, according to Trade Commissioner Louise Hall, Paris, in a report to the Detroit office of the Department of Commerce.

About half a million bicycles are now used in Greater Paris, the Department of the Seine having 476,665 registered, or two to every eight inhabitants. In the highly industrial departments of Northern France, a total of 856,000 bicycles are in use, or one to every five inhabitants. There are 10 times as many bicycles in France as automobiles.

### Get Rid of HEMORRHICIDE (Piles)

Burgess operations for the relief of piles can often be avoided by the use of Anusol Suppositories.

Your best assurance of their remedial effectiveness is the fact that Anusol Suppositories have a twenty-five year record of success in the treatment of this painful condition.

Nothing injurious or habit-forming in the Anusol formula. Safe for people of every age. Sold only in red BOTTLED form.

Ask your druggist or write us for a dozen, postpaid, for \$1.25. Canadian & Foreign Agency Company, Unity Building, Montreal.

### ANUSOL SUPPOSITORIES

### Will Plead Law-Cases In European Courts

**American Woman Attorney Going To Paris, Athens and London**

An American woman attorney will try cases in Paris, Athens and London while on a "vacation." She is Miss Grace Brown of Detroit, who plans to sail to Europe soon to carry out her legal plans. Mrs. Miss Brown will represent an Armenian claiming \$500,000 from the Turkish Government for land he alleges was confiscated. She has been retained in an immigration case in Athens and an involved estate will claim her attention in the London courts. Miss Brown has received introductory letters to the foreign courts from Secretary of State Frank B. Kellogg.

### Toes Kept Free

#### From Sore Corns

When you notice any sign of callous or soreness on your toes, it is time to polish on a few drops of "Patum's Corn Extract." Do this, and you prevent corns. No matter if the corn hard or soft. Let it be on top or bottom, or between toes, or even move it without pain. Insist on "Patum's" Corn Extract. It does the work—and roots out the corn.

#### Self-Sustaining Air Services

Probably the only two self-sustaining air transport routes operated during 1926 in the Empire were in Canada—those from Halifax to the Rouyn, and from Sioux Lookout to the Red Lake mining fields. These are on an absolutely commercial basis and have had no Government subsidies.

### A PERFECT MEDICINE FOR LITTLE ONES

**Baby's Own Tablets Should Be In Every Home Where There Are Children**

The perfect medicine for little ones is found in Baby's Own Tablets. They are gentle but thorough laxative which regulates the bowels, sweeten the stomach, drive out constipation, and remove intestinal worms and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the most delicate babies, and you are absolutely guaranteed from court citations or any other injurious drugs.

Concerning the tablets, Mrs. Alex. L. Perry, Atlanta, N.Y., writes: "I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

**Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brooklyn, Ont."**

#### Japan Needs Post Offices

**Government Is Considering Plans For Increase In Number**

More post offices are needed in Japan. For each 6,700 persons in the country there is only one post office. England and Germany have one to 2,000 persons. The Communications Department is considering plans for the increase in the number of offices and an appropriation is to be included in next year's Budget for the opening of 8,000 more post offices over a period extending ten years. At the end of ten years each village throughout Japan will have a post office all to itself.

#### It Will Prevent Ulcerated Throat

At the first symptoms of sore throat, which presses ulceration and inflammation, take a spoonful of Dr. J. D. Kellogg's "Fruit Jell" and sugar to it to make it palatable.

It will allay the irritation and prevent the ulceration and swelling that are painful. Those who were probably subject to sore throat thus made themselves immune to attack.

#### Antiseptic Perfumes

**Perfume and Toilet Preparations Have Distinct Antiseptic Value**

More important than the agreeable sensations carried by the delicate nasal nerves to the brain and their effect on the nervous system is the hygienic value of a perfume and a toilet preparation, states the N.R.A. service in a bulletin recently published. Nearly all perfumery products are antiseptics, and many of such are medicinal. The use of perfume in dressings lessens the infection that thrives in crowded covered spaces even if freely cleaned by chemicals such as carbolic acid, formaldehyde or chloride of lime. Alcohol between 60 to 80 per cent strength is a strong antiseptic and increases the gericidal action of essential oils. Rosewater, owing to its contents of phenyl-ethyl alcohol, which can be made synthetically, is used as a sleeping potion for children and benzyl benzoate and benzyl alcohol, ether synthetics, have pain-alleviating properties similar to opium without its narcotic and habit-forming properties.

#### Punished For Cruelty

We wonder what some of our courts would say to a fine of ten dollars and a day of twenty-five more for scrapping a live cat with a carriage. Yet this was the punishment imposed upon a man in the English Police Courts. Some people think a fish is not an animal.

#### The Oldest University in the World

is that at Pavia in Italy, founded in 82 A.D. by Lothair, grandson of Charlemagne.

One day's exercise with a wood saw is worth two weeks of physical culture.

Drives away pain — Minard's Liniment.

### Will Plead Law-Cases In European Courts

**American Woman Attorney Going To Paris, Athens and London**

An American woman attorney will try cases in Paris, Athens and London while on a "vacation." She is Miss Grace Brown of Detroit, who plans to sail to Europe soon to carry out her legal plans. Mrs. Miss Brown will represent an Armenian claiming \$500,000 from the Turkish Government for land he alleges was confiscated. She has been retained in an immigration case in Athens and an involved estate will claim her attention in the London courts. Miss Brown has received introductory letters to the foreign courts from Secretary of State Frank B. Kellogg.

## DOMINION NOW HAS A SEAT ON LEAGUE COUNCIL

Geneva.—Canada and Cuba were elected to the League of Nations Council; three seats were to be filled, and Finland got the third.

Canada, Cuba and Finland will sit for three years on the council, which now consists of 14 members. The new members are Great Britain, France, Italy, Japan and Germany, which held previous seats in perpetuity, and China, Colombia, Chile, Romania, Poland and Holland, who are non-permanent members.

The new line-up means that the council contains four countries representing the American continent and has created special interest among many delegates because of the particularly friendly relations existing between Canada and the United States. From another standpoint the election causes interest of an equally Canada is a member of the British Empire. Hence, in the view of numerous delegates, the importance of the British Empire on the council is increased, although the general impression exists that Canada will act absolutely independently, insisting upon her sovereign rights as an independent member of the League of Nations.

The three new members will take office immediately, replacing Czechoslovakia, Salvador and Belgium, whose term has expired.

Presumably Senator Raoul Dandurand will represent Canada on the council. He was president of the 1925 Assembly; he speaks English and French with equal fluency and is popular in Geneva's political circles.

Dr. Aristides Aguirre Bethancourt, Minister to Berlin, probably will be the choice of Cuba. He has long been one of the most prominent figures in league activities and served as president of the recent International Conference on Transit and Communications.

Canada won her victory by a narrow margin, getting 26 votes or one more than the necessary majority. Cuba led the poll with 40 votes, and Finland came second with 33.

## No Alberta Coal For Ontario

### Finding Of Rail Commissioner Will Make Price Prohibitive

Calgary.—"The finding of the commission at once kills all hope of sending Alberta coal to the Ontario market," said Jesse Gouge, Drumheller coal operator.

Mr. Gouge said that to the \$12.20 per ton mentioned as the inclusive cost "plus the element of profit," would have to be added the actual cost of coal which at \$3.75 per ton would bring the figure up to \$15.95. That again would have to be added the profit of the retailer in Ontario consumer \$18.45 to \$18.95 per ton, at which figure it would be placed entirely out of court, as American anthracite coal was being sold from \$15 to \$16 a ton.

"There is no hope of capturing the Ontario market for Alberta coal," said Mr. Gouge, "as this could not be done unless there was a flat rate of \$7 a ton established."

## Insured For Millions

### 187 Persons In U.S. and Canada Carry Heavy Policies

New York.—The lives of 187 persons living in Canada and the United States are worth \$1,000,000 or more each to insurance companies, according to a survey made public by the Spectator Company, of New York.

Rudman Wanamaker, merchant head of the list with \$7,000,000 in policies. Several persons including Dr. F. G. Banting of Toronto, discoverer of insulin, are insured for \$500,000 each.

**Farmers Seek Representation**

Winnipeg.—Appointment of a western farmer to the Board of Railway Commissioners, whose term will expire in October, is being urged by the Canadian Society of Agricultural Engineers, communications forwarded to the federal Government. The council also has suggested the membership of the board should be enlarged to seven, and that at least three members should be from Western Canada.

The most illiterate country in the world is Nata, Africa, where 94.3 per cent. of the natives can neither read nor write. Egypt and Guatemala have 97.2 per cent. illiteracy.

W. N. U. 168

## Good-Will Between Canada and U.S.

No Room For Distrust Says Hon. William Phillips

Ottawa.—There is no place for distrust or misgivings between Canada and the United States, declared Hon. William Phillips, U.S. minister to Canada, in the course of a stirring address to members of the Canadian Club, and delegates to the annual conference of the Association of Canadian Clubs, at a luncheon here.

"It is an easy matter for us to understand one another," he said, "because our interests touch at some points. We are, therefore, we are thorough. Well acquainted. We are no strangers to each other, yet we still have much to learn, one from the other. Already we have gone a long way on the road toward mutual co-operation, but we still can go even further."

"Much of the sorrows and sufferings of the world would have been avoided in the past if nations had only found the courage to approach their international problems in an attitude of reasonableness and fair play.

"With diplomatic relations now established and with good-will manifest everywhere, Canada and the U.S. are ready, I hope, to discuss all questions of mutual concern, as they arise, cheerfully and frankly, and in a spirit of helpfulness. In so doing we shall have the happiest illustration of what we hope civilization is for the entire world. For between us two countries there is no place for distrust or misgivings.

## Liable To Dumping Duty

New Ruling On Imported Apples Has Been Issued

Ottawa.—Imported apples have been declared liable to dumping duty. A ruling issued by the Department of National Revenue holds that apples are to be considered as of a class or kind produced in Canada until otherwise ordered.

This means that a special (or dumping) duty in addition to the regular duty, will be applied to imported apples. The dumping duty will be the difference between the appraised value and the purchase price but not exceeding 15 per cent. of the appraised value.

## Typhoon Devastates Japan

Four Hundred Dead and Many Injured

By Tidal Wave

Tokio.—Four hundred persons are dead, 2,300 injured, and 700 houses destroyed in Kumamoto, Island of Kyushu, in consequence of the typhoon and tidal wave, according to reports to the Japanese home office.

In Fukuoka, Nagasaki, and Kagawa prefectures there were few casualties, but numerous houses were inundated and damaged.

When the typhoon struck Tokio several thousand houses in the low-lying sections were flooded. Thirty children were injured when the roof of a schoolhouse was blown off.

## Flee From Earthquake Area

Tourists Along Black Sea Coast Crowd All Transport

Moscow.—Thousands of panic-stricken tourists along the Black Sea coast were crowding all means of transportation to the interior, the port city which has been shaken by earthquakes in the past few days, causing death and injury in many districts. Late reports from Yalta say that 13 persons have been killed there and 355 injured. Slighter shocks were still continuing in the region, the advices said. Relief measures are under way.

**Should Lead the Way**

Geneva, Switzerland.—The United States, France, Germany, Italy, Holland and the other drug manufacturing or producing countries should lead the way in curtailing the output of narcotics in the opinion of Colonel Daniel W. MacCormack of Boston, technical advisor of the Peruvian government, as expressed on behalf of Peru before the League of Nations social welfare committee.

**Farmer Killed By Airplane**

Canton, Ohio.—When a passenger airplane, just taking off from a new airport, struck his farm wagon here, Norman Hopkins, 26, farmer, was killed. Hopkins' two sons, Glen, 6, and Oscar, 9, who were riding in the wagon, were injured.

**Next Meeting At Edmonton**

St. John, N.B.—Edmonton, Alta., was chosen for the next annual meeting of the Associated Workers' Compensation Boards of Canada here. Sterling, of that city, was elected vice-president.

## For Outpost Work

Miss B. R. Terry, R.N., Toronto, Ontario, nurse, left recently to begin work at the new medical outpost, All Saints' hospital, Aklavik, Northwest Territories, which has been opened under the auspices of the Mackenzie River diocese of the Anglican church.

## POSTAL DEFICIT MUCH SMALLER THAN EXPECTED

Ottawa.—Reduction of postage rates provided by the budget of 1926 has resulted in a deficit in the Post Office Department, but it is about a million dollars less than was originally estimated.

For the fiscal year which ended March 31 last, the return is being made up and the deficit is placed at \$1,600,000. The estimated shortage was about \$2,500,000.

It would appear from these figures that the postage rates in the post office from three to ten cents per ounce has increased the volume of letters passing through the mails.

Instantaneously, a marked increase in the parcels post is recorded and a big business is being done. Despite the one third cut in the letter rate the result of the operations under the new conditions leads to the belief that in a year or two at least equilibrium will be established between postal revenues and expenditures.

Two things above all appear to have been necessary under the circumstances," he said. "In the first place, a review of conditions as they actually exist both inside and outside the service, with an awakened and enlightened public conscience on customs matters as a result. The work of the parliamentary committee and our commission have made the power fairly safe. In the second place, it is essential to have a head to the department with the ability, will and determination to bring about the necessary reforms. There is every indication that the present head of the department is such a man."

**Exodus Not Serious**

Only Ten Per Cent. Of University Students Go to States

Winnipeg.—The record of Canadian university graduates to the United States is not as serious as it is held to be in some quarters, according to Sir Robert A. Falconer, president of Toronto University, in an interview here.

"I went into the matter quite carefully at one time," Sir Robert said, "and I found that, according to figures I have from various universities in Canada, the emigration of graduates did not exceed 10 per cent." Sir Robert added that this exodus "is not such a terrible thing as some people imagine; it supplies an outlet for our graduates." No one, he said, would bother to obtain a university education if they did not get the opportunity to use it.

## Sittings Of Railway Commission

Ottawa.—The Board of Railway Commissioners announced yesterday its dates for sittings in Western Canada:—Saskatoon, Oct. 10; Edmonton, Oct. 12; Vancouver, Oct. 19; Victoria, Oct. 22; Nelson, Oct. 24; Lethbridge, Oct. 27; Calgary, Oct. 28; Regina, Oct. 31; Brandon, Nov. 1; Winnipeg, Nov. 9; Fort William, Nov. 5.

**Should Lead the Way**

Geneva, Switzerland.—The United States, France, Germany, Italy, Holland and the other drug manufacturing or producing countries should lead the way in curtailing the output of narcotics in the opinion of Colonel Daniel W. MacCormack of Boston, technical advisor of the Peruvian government, as expressed on behalf of Peru before the League of Nations social welfare committee.

**Farmer Killed By Airplane**

Canton, Ohio.—When a passenger airplane, just taking off from a new airport, struck his farm wagon here, Norman Hopkins, 26, farmer, was killed. Hopkins' two sons, Glen, 6, and Oscar, 9, who were riding in the wagon, were injured.

**Next Meeting At Edmonton**

St. John, N.B.—Edmonton, Alta., was chosen for the next annual meeting of the Associated Workers' Compensation Boards of Canada here. Sterling, of that city, was elected vice-president.

## TAKE MEANS TO PUT AN END TO CUSTOMS FRAUDS

Ottawa.—"We have had some evidence brought before us to indicate that in certain quarters there would be a revival of illegal practices once our commission ceased to exist. For the benefit of such parties and others similarly disposed I think I can promise that other means will be devised and rigidly enforced for detecting such frauds and that for this purpose when such frauds and illegal practices are discovered, they will be met with swift and relentless punishment."

The above was one of the statements made by Chief Commissioner J. T. Brown, of the Royal Customs Commission, in a brief address at the close of the public sittings of the commission here.

"There have been some who have been guilty of defrauding the Crown of its just revenues and who have escaped the scrutiny of our investigators," he continued. "For such let me say that the mere fact that they have thus far escaped exposure and prosecution must not be taken as any assurance that such practices can be continued with impunity."

The chief commissioner's closing address, which was conducted in English, was followed by Mr. H. Wright and Ernest Roy, expressed their appreciation of the work done by the commission and others associated with the work of the commission during the many months of the inquiry. Irrespective of the report which would be prepared and submitted to the Governor-in-Council, the investigation had been well worth while, said the chief commissioner.

"Two things above all appear to have been necessary under the circumstances," he said. "In the first place, a review of conditions as they actually exist both inside and outside the service, with an awakened and enlightened public conscience on customs matters as a result. The work of the parliamentary committee and our commission have made the power fairly safe. In the second place, it is essential to have a head to the department with the ability, will and determination to bring about the necessary reforms. There is every indication that the present head of the department is such a man."

**Projected Flight Cancelled**

American Globe Circling Tour To End

At Tokio

Tokio.—The projected flight of the American monoplane Pride of Detroit across the Pacific Ocean to the globe-circling tour called off here by its captain, Edward F. Schiele and William S. Brink.

The decision to call off the flight followed a lengthy conference with aviation experts here and others interested in the undertaking. Many cables from America urging the fliers to stop at Tokio also carried weight. Brink and Schiele finally concluded the attempt to negotiate the Pacific would be suicide.

They will take an early boat for the United States and have their monoplane shipped home.

## More Setters For Lethbridge

Lethbridge.—The Canadian Colonization Association has been so successful in the prairie district that it has been decided to phase out 25 per cent. of its settlers this Fall. One of the present settlers has placed 120 acres in sugar beets, 58 acres in potatoes and 400 acres in wheat and other small grains from which he returns this Fall should be close to \$15,000. There are eight families now working for him.

## Indian-Paleface Romance

This little lady is evidently attracted to the small Indian boy, and perhaps even more to the gorgeous and unusual house he lives in—a typical Stone Indian Teepee. So she has mastered her shyness and is tempting him with a few tresses. The little Chief is showing tooth to be tempted and meets her more than halfway. This pretty little incident occurred during the great Indian Day Celebrations at the Bant Springs Hotel recently and was duly registered by a C.P.R. photographer.

## Fast Steamer Plane Service Is Planned

Would Cross From New York To France In Four Days

New York.—The New York Herald Tribune says that plans are nearly completed to launch an all-American cabin-class seaplane-service between Montauk Point, Long Island, Plymouth, England, and Havre, France, with fast ocean liners that will make the crossing in four days.

The proposed line is to be incorporated as the New York, London, Paris Steamship Company, and will operate a fleet of ten 20,000-ton liners. The ships, which will resemble United States naval destroyers, but about twice their size, will be driven at an average speed of 31½ knots. They will be about 80 feet long with a beam of 25 feet and a draft of 24 feet 9 inches.

"The ship will be an all-cabin liner, with an open deck, and will be an exclusive for passengers, will carry 400 first class, who will be accommodated in small cabins, slightly larger than Pullman car drawing rooms.

## Victim Of Experiment

### Scientist Meets Death While Testing Effect Of Anesthetic

Manchester, Eng.—A victim of his own scientific zeal, Dr. Elsie Raynor Wilson, surgeon and anaesthetist with a British and American reputation, was found dead in his laboratory. His wife discovered the experimenter with a mask over his face before a machine which administered gas mixtures.

It had been Dr. Wilson's great ambition to obtain and prolong the anesthetic state, which is obtained momentarily when a person under an anesthetic loses feeling yet retains consciousness.

Dr. Wilson's brother said the doctor had been able to inflict pain upon himself with power to prevent himself from losing consciousness completely. Colleagues are of the belief that he met death experimenting on himself to discover the actual effects of an anesthetic which it was his conviction was the only way to obtain essential data.

## REQUIRE MORE TRADE ROUTES FOR THE WEST

American Globe Circling Tour To End

At Tokio

Tokio.—The projected flight of the American monoplane Pride of Detroit across the Pacific Ocean to the globe-circling tour called off here by its captain, Edward F. Schiele and William S. Brink.

The decision to call off the flight followed a lengthy conference with aviation experts here and others interested in the undertaking. Many cables from America urging the fliers to stop at Tokio also carried weight. Brink and Schiele finally concluded the attempt to negotiate the Pacific would be suicide.

They will take an early boat for the United States and have their monoplane shipped home.

## Woman Drowned At Sea

Carried Over Side Of British Liner

By Huge Wave

Philadelphia.—Mrs. Cyril H. Mumford, 36, of Fair Acres Farm, near Hamilton, Ontario, was swept overboard from the deck of the British liner London Mariner, while the vessel was en route from England to this city.

The tragedy was revealed when the steamer docked here, bringing a tale of a stormy voyage, the wind and waves threatening the woman.

Mr. Mumford, a former British army officer, was returning with his family from a tour of England, Scotland and France when Mrs. Mumford, who had been on an upper deck of the vessel, was carried over the side by a huge wave.

## Proposals To Outlaw War

New Idea Presented To League By Norway Delegate

Geneva.—A "voluntary universal arbitration" was introduced at a session of the League of Nations on Tuesday by Mr. F. Nansen, of Norway. The pact created tremendous interest as a concrete development of the movement to outlaw war.

The pact makes all war between signatory states impossible by arranging settlement by an arbitration board of all conflicts which are not handled by the World Court or are not solved by the Council of the League of Nations.

Royal Brothers Arrive Home

Southampton, Eng.—The Prince of Wales, looking very bronzed and fit and in excellent spirits, stepped ashore from the Empress of Canada here, ending his trip to Ceylon. He was accompanied by Prince George, the Mayor of Southampton and other city and county officials welcomed the two princes, who immediately boarded the train to London.
